

Role description

Pro-Vice-Provost (Artificial Intelligence)

Department: Office of the Vice-Provost (Research)

Reports to: Vice-Provost (Research)

Duration: Three years in the first instance

Main purpose of the job

The Pro-Vice-Provost (Artificial Intelligence), a new role, will be UCL's strategic lead for artificial intelligence (AI), ensuring that UCL's AI activity is greater than the sum of its parts, and engaging relevant researchers with industry, policymakers, partners and supporters in mutually beneficial relationships.

Duties and responsibilities

Develop, implement and regularly review the UCL AI Strategy, ensuring that UCL's AI activity is greater than the sum of its parts and that UCL identifies and capitalises on opportunities and risks, and share insights to support UCL's AI strategy

General responsibilities

Actively comply with and promote UCL's Equality, Diversity and Inclusion policy
Model [UCL's Core Behaviours](#)

Any other duties as are within the scope, spirit and purpose of the role. Note: As duties and responsibilities change, the role description will be reviewed and amended in consultation with the roleholder

Appointment process

Applications should be in the form of a letter, together with a short CV, to Prof David Price (d.price@ucl.ac.uk) by 12 noon on 10 May. If required, short interviews will be held in May or June. The decision on appointment to this role will be made by a panel including the Provost and the Vice-Provost (Research), for three years in the first instance.

There is no FTE percentage specified for this role. It will be up to the successful candidate and
